Recycled Content – LEED 2009 and LEED v4

Optimus Steel, LLC operates a steel “Mini-mill” located near Beaumont, TX. This mill utilizes an electric arc furnace to recycle ferrous (iron based) scrap metal. Various grades of ferrous scrap are procured from domestic sources, most of which are within a 500-mile radius of the Beaumont Mill. Grades are categorized as pre-consumer, post-consumer, or home scrap (scrap generated and recycled at the mill) based upon the source.

For the year 2021, recycled content is as follows:

Mill	Post-Consumer Scrap Content (%)	Pre-Consumer Scrap Content (%)	Other iron and ferroalloys content (%)
Beaumont, TX	84.7	9.5	5.8
